TOR 2

Strengthening nursing and midwifery in governance and leadership in the health systems

The WHO collaboration center responded to a survey by the European Region of the World Health Organization on Epidemiology of and Risk Factors for Coronavirus Infection in Health Care Workers

We have established a national and international network of the center with the nursing directors in the health organizations

By the request of the WHO Regional Office for Europe, the WHO collaboration center, passed a specification policy document on case studies of good practice/ effective response to COVID from a workforce perspective.

We conducted research on:"Recommendations from the Professional Advisory Committee on Nursing Practice in the Care of ECMO–Supported Patients"

TOR 3

Build up the evidence base for effective regulatory accreditation, licensing and education training policies, to strengthen governance in nursing

In 2021, the trend of increasing the rate of nurses in Israel to 1,000 people continued.

The authority's of the registered nurse and the specialist nurses have been expanded, and there has been an increase in the number of new students in nursing.

We are planning next year to establish an online consultation system on governance in nursing

Activities

Goals for 2022

To create a customized, culturally relevant programme or modules to support capacity building for senior leadership and management skills in nursing and midwifery for Member States in the WHO European Region.

Knowledge sharing

To develop guidance for Member States in approaches in the domains of accreditation, licensing and education training policies.

Consulting

To develop guidance for Member States for strengthening nursing and midwifery governance and leadership at the macro, meso or micro levels of health systems.

Summery

Our participation in the planning of the WHO strategic plan for the empowerment of nurses and midwives in the Europe reign , was an opportunity for us to connect to the road map of all countries.

We would like to produce tailored training programs in nursing governance according to the needs of countries that will turn to us.

We propose to develop a uniform digital space for all centers

Thank you

WHO Collaboration center for Leadership and Governance in Nursing
